fig.2.2 Leave Details page

The screenshot shows the 'Leave Details' page. On the left, there's a sidebar with filters: 'Profile*', 'Leave types*', 'Summary', 'Start date*', and 'End date*'. The main content area has a table with headers: 'Leave type', 'Summary', 'Start date', and 'End date'. The table body is empty, displaying 'No rows'. At the top right of the main area, there are buttons for 'MORE FILTERS', 'IMPORT FILE', 'ATTACHMENTS', and 'UPLOAD MANY'. At the bottom right, there are 'CANCEL' and 'SAVE' buttons. The footer shows 'All Rights Reserved By DOYEN Infosolutions Pvt. Ltd.' and 'v 0.1.0'.

Fig.2.3 Calendar view

The screenshot shows the 'Calendar' view for June 2024. The calendar grid displays various leave events for different users. For example, on June 6th, there's an event for 'Akash Padwal: gbg'. On June 10th, there's an event for 'Nishi Panjwani: jgahj'. On June 11th, there's an event for 'Abhinava Mohapatra: Imghh'. The right sidebar lists 'Leave Types' and 'Holidays'. The footer shows 'All Rights Reserved By DOYEN Infosolutions Pvt. Ltd.' and 'v 0.1.0'.

3. Leave-type

- 1- The Leave-type module is primarily used for maintaining leave types.
- 2- There are two pages associated with the Leave-type module:
 - a. Leave-type Overview: This is the landing page.
 - b. Leave-type Details: This page is used to view Leave-type details or create leave-type records.
- 3- It has following features:
 - a. Create, update, delete, and read records (CRUD).
 - b. Filter records.
 - c. Export all records or export filtered records.

d. Action buttons for quick access to update or delete records.

Fig.5.2. Complaint Details page

The screenshot displays the 'Complaint Details' page in the DOYEN system. The top navigation bar includes links for Home, Profiles, Leave types, Leaves, Attendance, Visa, Skills, Departments, Projects, Complaints (highlighted), System settings, and a user profile for SHUBHAM. The main content area shows a complaint form with the following details:

- Issue:** account issue
- Description:** account issue
- Department:** Account
- Assigned to:** (empty dropdown)
- Status:** TO DO

Below the form, there is a 'Comment on this issue' section and an 'Activity' section. The activity log shows a record by Shubham Bankar on 2024-06-13 12:39, with roles CREATOR and LATEST. The footer indicates 'All Rights Reserved By DOYEN Infosolutions Pvt. Ltd.' and 'v8.1.0'.

9. System Settings

1- System setting has four sub modules

- Roles
- Rights
- Permissions
- Security

a. Roles module:

1- Roles module is primarily used for maintaining employee roles.

2-By using this roles we can maintain access for employees.

3-There are two pages associated with the Department module:

- Departments Overview: This is the landing page.
- Departments Details: This page is used to view department details or create department records.

4-It has following features:

- Create, update, delete, and read records (CRUD).
- Filter records.
- Export all records or export filtered records.
- Action buttons for quick access to update or delete records.

5- Default role

ADMIN: ADMIN has all modules access.

GUEST: GUEST has access to only read employee data.

NOTE : Employee actual work roles and application level roles are same.

b. Rights module:

- 1-The Rights module is primarily used to maintain module-wise rights.
- 2-By mapping Rights with Roles, we can maintain access control for each layer.
- 3-The following are examples of how we maintain rights names:
{module_name}_API_CREATE, {module_name}_API_UPDATE,
{module_name}_API_DELETE.
- 4-These rights are used to control access to the API in the backend.
- 5-For each new module we add, we can also add corresponding rights for that module.

c. Security module:

- 1-Security module is primarily used to map rights to roles.

d.Permissions:

- 1-Security module is primarily used to map rights to roles.
